3) After seeing "Profile Downloaded," go to your Settings and select "Profile Downloaded"

4) After selecting "Profile Download," select "Install" then you'll likely be asked to put in your device passcode. After that, you'll select "Install" one more time

5) After this, you'll see that your certificate is verified.

6) Finally, go back to Settings-General-About. Scroll to the bottom and select "Certificate Trust Settings." Toggle the "Enable Full Trust" on.
